ITG- Strategy 2013 – 2017

Overview

The picture above is showing an overview over the main points of the strategy. Here are the comments on it:

Strategy

The three **main points of ITG's Mission** are:

Management of the the Takhi population on the regional level (Gobi B) and on the international Level (Central Asia)

Protection of the habitat of the Takhi: Gobi B and its surroundings

Connecting habitats for free ranging takhis in the long term

In a longer view ITG has the **vision** of the transnational Peace Park including Gobi A, Gobi B, Khalameili NB and the areas between these Core zones.

The new strategy has to be well balanced between goals, finances, organizations and cooperations.

Therefore the strategy is strictly focused on the three main points of the mission.

Organization

Until know the organization had two main weaknesses:

- Resources for executive work were extremely restricted. There was a gap between the demands and possibilities to fulfill them.
- Due to that gap the control of the executive staff in Mongolia was deficient. The executive organization in Mongolia hat to be revised and the performance has to be examined.

Finances

The main finance of ITG is based on "Friends of the Takhi". Friends of the Takhi are a sustainable source of finance to pay for the basic needs of the project. But the source is not producing enough income to finance the development of the project as well as different projects. For this purpose ITG will focus on two potential sources:

- Foundations (Swiss and international ones)
- Luxemburg Founds for Mongolia

Cooperations

Cooperations are crucial for the success of the reintroduction project. The most important is the cooperation between ITG and the Mongolian Ministry for Environment, Nature and Green Development. ITG is the responsible Partner which has to embed the activities of all other organizations involved. The project is depending in active, initiative Partners, but their activities have to be integrated in the framework of the cooperation between the Ministry and ITG.

Partly cooperations with partners of ITG have been poorly managed due to the very restricted resources. An important example is the cooperation with Prague zoo. In the future ITG has to concentrate on few strategic partnerships. For each one a member of the executive board will be responsible.
